

TaskNavigator

Task-Specific Proactive Document Delivery

- Web-based personal information management & collaboration support
- Proactively provides users with documents relevant to their current task from several sources

Main Features:

- Teams and individuals coordinate their tasks via globally accessible task lists and Work Breakdown Structures
- Relevant documents are pushed to users; reduced effort with regard to searching for useful documents
- Process know-how is captured on the fly and can be directly reused

Main Benefits:

- **For individuals:**
 - ✓ Universal task list (instead of Post-Its, e-mail inbox, ...)
 - ✓ No need to manually search for documents in different repositories
 - ✓ Direct access to colleagues' best practices
- **For distributed, dynamic teams:**
 - ✓ Globally accessible, web-based collaboration space
 - ✓ On the fly task delegation & progress tracking
 - ✓ Shared understanding of responsibilities
- **For companies:**
 - ✓ Reduced risk that important documents are overlooked
 - ✓ Process know-how is captured on the fly and can be directly reused
 - ✓ Service-oriented architecture allows easy application integration
